Subject: The Planes are back

Hi

Over Xmas and New Year aircraft activity seemed to have returned to pre Trial levels.

But I now have to complain because we are now experiencing significant disturbance again.

I have just been woken at 06:10 hrs by a low flying aircraft. Another noisy one at 06:25 hrs.

On Saturday night at approx 17:30 hrs we had to stop talking as the aircraft was so loud we couldn't hear each other speak. How bad is that?

Has the routing of aircraft been changed back to Trial pattern in the last week?
